Success Stories

A 4-day seminar about

“EAF ELECTRICS FOR ELECTRICIANS”

for electrical experts in the steel industry.

BSE ACADEMY organised the first OPEN course for electricians from steel plants all over the world from 15th-18th of November 2010.

The OPEN courses at the BSE ACADEMY take place all year round with specific subjects on fixed dates. Our courses are aiming for participants from different companies.

The course “EAF Electrics for Electricians” has been giving special electrical know how required for mini mills / electric arc furnace industry covering power supply, automation and maintenance. The course was focussing on electricians who wish to enhance their technical understanding in EAF electrics for their daily job.

Seminar Topics:

- Power Supply
- Automation
- Maintenance
- Plant visit of Badische Stahlwerke (BSW)

The benefit:

The participants benefited from discussions with BSE experts and are now able to judge the strengths and weaknesses of electrical systems in order to manage and develop within their field of responsibility.

Next to the training there is another important part of the course: **networking** and **experience exchange** among participants. This was done during the course and at the two evening events which took place at Strasbourg and at Durbach.

“In total the instructors were very nice and sympatic with a very good knowledge of the topic. I will recommend this seminar to others”.

Höganäs, Sweden

First classroom training later answering questions at site of BSW.

Two evening events took place: sightseeing at Strasbourg and wine tasting at Durbach.
